## JUNIOR DATA ANALYST

## EDUCATION

**SIM-University of London (LSE) - *Data Science and Business Analytics*** **Sept 2024 – May 2026**

- **CHESS Distinction Award (2024)** – top academic honor for excellence in first-year data science and business analytics major examinations, including Statistics, Calculus, Global Business, Basic Economic (total score: A)
- **WILL Award** – selected by career connect (SIM) for overseas internship in top-tier company (1,000 SGD reward)

## WORK EXPERIENCE

**PT. Akur Pratama (YOGYA GROUP) // retail company– *Junior Staff IT Intern*** **Jul 2025 – Sept 2025**

- Engineered multi-dimensional clustering models by collecting and preprocessing transactional data from 80+ retail branches, integrating generational demographic, product preferences, geolocations, and peak shopping timelines to provide consumer visibility.
- Developed an RFM-based loyalty framework to automate membership analysis and optimize personalized coupon distribution, bridging the gap between technical datasets and high-impact marketing iterations.
- Analyzed website transactional behavior to identify online purchase patterns and preferred items, generating insights that guided e-commerce optimization and product strategy that optimized online sales performance.

**YouTube and TikTok – *Content Creator*** **Dec 2021 – Present**

- Managed 1.8M YouTube subscribers within 2 years, creating daily entertainment content specializing on shorts videos.
- Collaborated with multiple brands, transforming creative concepts into campaigns that boosted engagement and drove measurable sales uplift.
- Supported weekly performance tracking for retail campaigns and social media platforms (YouTube/TikTok), analyzing **internal engagement and external sales uplift** to guide content strategy

**PPI Singapura – *Data and IT Subcommittee member*** **Jan 2025 – Present**

- Revitalized the organization's public-facing website using WIX, significantly elevating UI quality and visitor interaction.
- Designed demographic insights visualization that improved transparency and contributed to 50 new member registrations.

**Data Analytics Club – *Subcommittee of Data Science Academy*** **Oct 2024 – Apr 2025**

- CCA activities of trained and deep diving into GenAI to streamline tasks, implemented RAG system, creating a Q&A chatbot to enhance service platforms and automate business Q&A processes.
- Applied deep learning and machine learning to diverse use cases, ranging from gaming logic to successfully detecting brain cancer from MRI imaging.

**MySkill Intensive Bootcamp – *Sales Data Analyst E-Commerce*** **Jul 2024 – Oct 2024**

- Analyzed large-scale campaign transaction data with Python and SQL to uncover performance drivers and diagnose the root causes of sales stagnation, generating insights that informed key operational decisions.
- Developed a stakeholder-focused Looker Studio dashboard that transformed complex datasets into actionable metrics supporting strategic planning across cross-functional teams.

## PROFESSIONAL SKILLS

**CI/CD**: GitHub | **Database:** SQLite, MySQL

**Data Analysis & Modeling:** Python (NumPy, Pandas, Sklearn), SQL (MySQL), RFM Modeling, Logistic and Linear Regression, Hypothesis Testing, ANOVA, Bayesian Analysis

**Visualization:** Tableau, Looker Studio, Matplotlib,Seaborn

**ETL & Data Pipelines:** (data cleaning, transformation, aggregation)

**Language –** Bahasa (Native), English (Intermediate)

## PROJECTS

**Data Science Programming Coursework of 5 years Aviation – *Python, Machine Learning*** **March 2025– April 2025**

- Engineered analytical modeling using Logistic Regression to minimize flight delays and optimize operational efficiency.
- Analyzed relationship between aircraft longevity metrics and diverted flights, identifying high-impact features such as carriers and distance to provide predictive solutions for fleet management.

**Thoughtfull Mental Health Digital Platform – *Data Analytic, Slackbot*** **Feb 2025 – April 2025**

- Processed and analyzed employee text data using Python to generate behavioral metrics regarding mood and workload patterns.
- Developed and maintained interactive Looker Studio and Tableau dashboards to monitor KPIs like sales profitability and workforce indicators, including employee mood and stress levels, to improve workforce well-being across departments.
